Non-Credit Bearing Internship (NAUI) / Extension of Credit-Bearing Internship Registration

This form is for NTU students to register their non-credit bearing or extension of credit-bearing internships.

An internship is a form of work-integrated education that integrates knowledge and theory learned in the classroom with practical application and skills development in a real-world work environment. While an internship occurs in a professional setting, it is distinct from work in that its focus is on the your learning and development in your relevant/selected field of study or practice. As such, the educational/training element must remain a key emphasis in any internship arrangement. This should be supported by an experienced and competent workplace supervisor/mentor who will guide, train, and appraise you throughout the internship.

Who is the form for?

If you intent to take up an internship apart from your degree programme's official internship, Complete this form to register the internship.

Such an internship will be non-credit bearing and one that is arranged by yourself privately. Completing such an unofficial internship will not contribute towards fulfilling your degree graduating requirement. Nevertheless, such an arrangement should still contain clear learning outcomes and terms of engagement with the company.

Do not register here if:

- You are going on an internship that is part of your degree programme curriculum, whether compulsory or optional. Such an official internship is one that is credit-bearing and completing one contributes towards the graduating requirements. There is no need to complete this form for such an internship.
- You are taking up a part-time or vacation job without purposeful learning outcomes planned. There is no need to complete this form.

After registration:

After submitting this form, your unofficial internship (we call it Non-AU bearing Internships or NAUI in short) will be reviewed and subject to endorsement by the Career & Attachment Office. A letter will be generated and issued as supporting document for GRT funding.

You will also be covered under the Public liability insurance which covers the cost of legal action and compensation claims made against NTU if a third party is injured or their property suffers damage when NTU student is working in third party's office or business property (i.e. injury or damage attributed to student).
